

As you know, Jeff supplied Hoffmaster in Fort Wayne and Indy the De-Escalation training for Active Threat situations. Since that training, I have received very positive feedback on the delivery of the training as well as the content. Everyone in the room was riveted to the information that was being presented and everyone took away something to think about. As we continue to work with Mighty Oak, I am continually impressed with the amount of information and the quality of information that is provided. I look forward to continually working with you in the upcoming years.

Thank you.
